IT Issues and Seminar Mid-year 2021

In partial fulfillment of the requirements for the course

IT337 IT Issues and Seminar

Submitted by:

PETEZA, BRYAN MAC H.

Program Name : Bachelor of Science in Information
Technology Student Number 202110264

Submitted to:

Ms. GLORIA DELA CRUZ

Date Started:

March 19, 2021

Date of

Submission:

March 26, 2021

Webinar Internal – Career Development:

I. Title:

Personal Character Quest

II. Overview:

This seminar focuses on important qualities and traits that students can develop as they enter the workforce. It highlights how these attributes help create a friendly and comfortable environment for new employees or those doing on-the-job training (OJT). The seminar is interactive, allowing everyone to participate and learn more about the professional skills needed to succeed at work

III. Topic Outline:

Topic 1 – D e v e l o p i n g P e r s o n a l i t y
Topic 2 – S e l f - A s s e s s m e n t
Topic 3 – Development of Traits and Character
Topic 4- Filipino Work Values Scale

IV. Certificate of Attendance:

V. Evidence or Proof of Attendance:

Age: _____ Sex: _____ Date: _____

Value Subscale	Responses					Raw Score	Percentile Rank	
	5	4	3	2	1			
ENV No. Weighted Response						40	58	Average
FAM No. Weighted Response						21	44	Average
INT-ACH No. Weighted Response						51	79	Strong
INTER No. Weighted Response						56	50	Average
MNG No. Weighted Response						29	43	Average
MAT No. Weighted Response						36	59	Average
OCC No. Weighted Response						46	52	Average
ORG No. Weighted Response						27	59	Average
IREL No. Weighted Response						28	3	Very weak
VAR No. Weighted Response						7	0	Very weak

VII. Evaluation:

Building character and self-discovery to get ready for a comfortable work life were the main topics of the seminar. The speaker began by using SpongeBob SquarePants characters to get us to reflect on our own characteristics. he also talked about difficult questions like "What are your strengths and weaknesses?" that many audiences find hard to answer because they find it awkward to answer. The speaker emphasize the value of traits like generosity, humility, and morality. The second speaker highlighted various characteristics and student preferences for their workplaces while introducing the Filipino Work Values Scale and sharing the findings of a test we performed. The overall goals of the seminar were to assist us in finding a comfortable work environment and preparing for the workforce, particularly as it relates to on-the-job training (OJT).

Topic: Navigating the Unknown: Opportunities and Challenges in Tech's Frontier

VIII. Title:

Day 2: Journey Beyond the Tech Horizon of ACM 17YSTOPIA!

IX. Overview:

The topic "Navigating the Unknown: Opportunities and Challenges in Tech's Frontier" looks at new and emerging technologies like AI, blockchain, quantum computing, biotechnology, 5G, and IoT, which are changing how we live and work. It highlights the many benefits these technologies offer, such as economic growth, improved skills, and better global communication, as well as the challenges they bring, including ethical questions, privacy concerns, security risks, and the need for rules and fairness. The discussion focuses on the importance of planning, learning new skills, and making sure these advancements are sustainable. The goal is to encourage everyone to work together responsibly to shape a future where technology benefits everyone.

X. Topic Outline:

Topic 1 – In-Demand Technologies

Topic 2 - Building a Strong Foundation

Topic 3- Skilling Up for Success

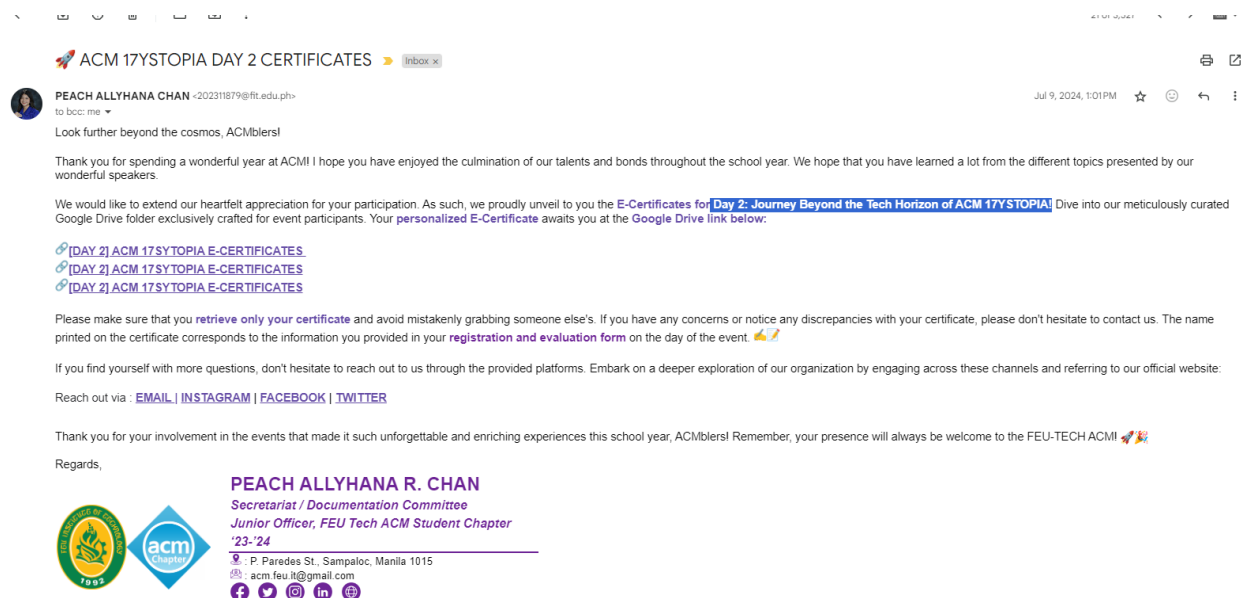

Topic 4- Competitive Advantage

XI. Certificate of Attendance:

XII. Evidence or Proof of Attendance:

Subscription:

XIII. Selfie Picture:

XIV. Evaluation:

During the seminar, I learned mostly about the working industry and how does AI, Iot, and more benefit to our society. I learned what is data science all about, the importance of data privacy and questioning where does our credentials go whenever we ask to chatgpt or any AI. It was an eye-opening experience that highlighted the need to understand and manage our data responsibly.

IT Issues and Seminar

Summit 2024

XV. Title:

Techno Summit 4.0 “Harnessing Emerging Technologies For Sustainable Development”

XVI. Overview:

The event focuses on exploring how technology and sustainable development intersect. It aims to give participants a space to learn about the latest technological advancements and how these can be used to promote sustainable practices and solutions. The event will include discussions, presentations, and networking opportunities that highlight innovative technologies to tackle global challenges like climate change, resource management, and social equity.

XVII. Topic Outline:

Topic 1 – Introduction to the FormData API

Topic 2 – Basic Concepts and Syntax

Topic 3 - Form Handling with FormData

Topic 4 - Working with File Uploads

Topic 5 - Sending Form Data with Fetch API

XVIII. Certificate of Attendance:

XIX. Evidence or Proof Involvement:

Picture of attendance

- pictures they are attending (Topic , Resource Speaker)

- proof of involvement (meeting to look for resource speaker, assigned to games, technical on the day of the event)

XX. Selfie Picture:

XXI. Evaluation:

During the seminar that I attended, the main topic was creating forms in web development. I learned basically how forms work, how does forms submit and get data just from an input type. Although I already have some knowledge about forms because of my previous lessons, I was able to understand more about it while listening to the speaker which is Mr. Kobe Ruado.

Then on our event, I was the host and during that event I also learned a lot especially about my capabilities. I learned that I can host an event because it is my first time being a host in an event. I think I managed to entertain my audience as well as the speakers.

Online Course Document :

XXII. Title:

Python For Beginners Course In-Depth

XXIII. Overview:

Starting with Python basics like running scripts from the command line, you'll explore how to store and manipulate information using variables and different data types. By understanding operators and operands, you'll be able to perform calculations and write functions to automate tasks. This foundation will equip you to read and comprehend Python code while gaining general programming concepts. As you progress, you'll delve into mathematical, random number, and trigonometric functions, potentially encountering web development concepts like CGI programming and web server configuration. Throughout this journey, you'll be actively using Python to write scripts for general productivity tasks.

XXIV. Topic Outline:

T o p i c 1 – G e t t i n g Started, Python From Command line, Values and Data Types, Operators and Operands, Function Calls

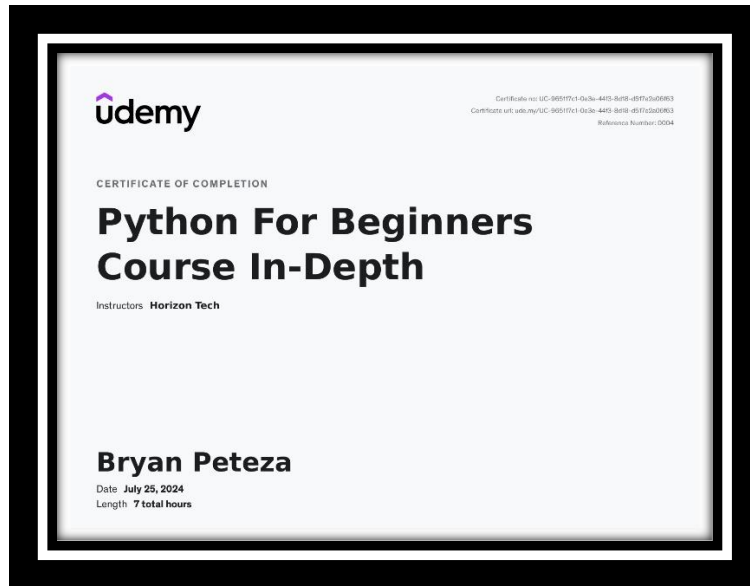

T o p i c 2 – Use variables to store, retrieve and calculate information

T o p i c 2 – Write scripts for general productivity tasks Read and comprehend Python code
Gain knowledge in regard to general programming concepts

T o p i c 2 – Data Types, Type Conversion, Functions, Statements and Expressions

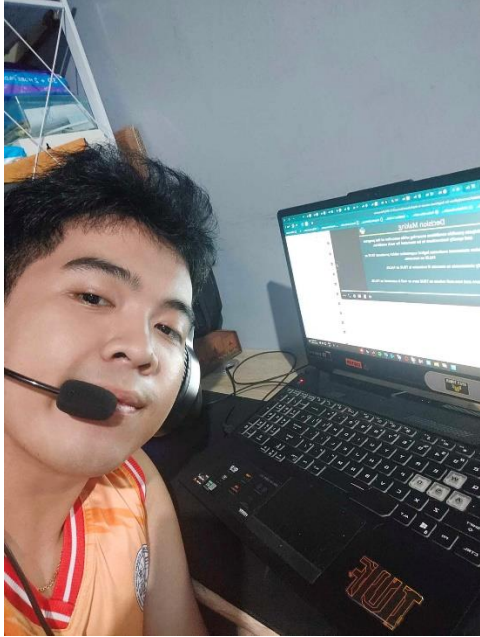

T o p i c 2 – CGI Programming, Web Server Configuratio

XXV. Certificate of Attendance:

XXVI. Evidence or Proof of Subscription:

XXVIII. Evaluation:

Since this course is a 7-hour course, I watched this for a few days and during those days, I learned the basic fundamentals of python, how it works and how different it is compared to php, c#. It is much easier compared to other languages and I also learned how powerful python is. Additionally, the course highlighted how versatile and powerful Python is. I learned about its wide range of uses, from web development and data analysis to artificial intelligence and automation. Overall, this course gave me a valuable introduction to Python, showcasing its advantages and potential for a variety of uses.
