Sumajit Farm

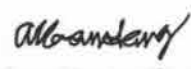

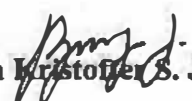

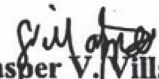

Dear Mrs. Jarapa,

Good day! We are 4th year Information Technology students currently working on Capstone 2. We would like to inform you, as our beneficiary, that our Capstone project, titled "CropCart: An Auction Place for Farmers with Market Demand and Peak Season Forecasting," will be implementing a test version of Xendit, an API designed for integrating payment methods. This decision is necessary because the live version of the API has not yet been activated by Xendit due to compliance and policy requirements.

With this, it will also be presented on our upcoming preliminary defense on Sunday, October 13, 2024 unless it can be activated before the said date.

We are hoping for your best consideration on our situation.

Respectfully yours,

John De A. Acueza
Alan Simon H. Carandang
Ryan Kristofer S. Jarapa
Jasper V. Villasper
